Lily, thanks so much. I'll look this over [REDACTED]
[REDACTED]

Thanks, John

Draft for your consideration:

Dear Lawrence,

Attached are updated consolidated concerns and questions from the public and the press that EPA has received recently. This update includes the questions that Lily received at the May 18, 2016, EJ Task Force Meeting, which follow common themes. As you see, beginning February 10, Dan Hirsch put many of his questions in writing, and Lily has been forwarding these and the others to the Navy for situational awareness. Many similar concerns came from multiple sources, so the questions and concerns raised at the public meeting 4/21 were not surprises. Several members of the public yesterday said that they appreciated that Lily provided factual details that addressed their concerns.

The Navy has excellent opportunities at its own July 13 meeting and at the July 21 EJ Task Force meeting to give more thorough explanations of the Navy's work on radiation cleanup [REDACTED]. The Navy, the public, and the regulatory agencies will all benefit from Navy presentation of the facts. The Navy can make use of the work already done to prepare fact sheets and posters for the April 2015 workshop on radiation and from the Q&A's for the April 21, 2016 EJ Task Force meeting.

John
